PRODUCT DESCRIPTION

A set of 3 PLANA LED under-cabinet luminaires in black with 4W and a luminous flux of 240lm each. One of the three luminaires has two functions that control the entire set: a touchless switch, which allows the lighting to be activated without having to turn on each lamp individually, and a function to dim/brighten the light as required by holding your hand under the sensor.

The set has been designed in a universal style. The flat housing of each lamp does not stand out significantly

from the furniture under which it is installed, which gives the effect of a tastefully furnished interior. The simplicity of the design of this model will enrich any decor of both residential and commercial space. This type of lighting is designed to be mounted to the bottom surface of a shelf or cabinet.

The set emits light with a pleasant and neutral colour of 4000K.

The set can be extended with additional lights from the same PLANA series.

The power supply unit is included in the set. Luminaires also available in grey.
