AdvitiMarka: **ADVITI** | Symbol: **AD-OP-6434BE27** | Ean: **5908254829567**

PRODUCT DESCRIPTION

Rio is the luminaire series that was created to illuminate an entire flat, house or large utility area within a single aesthetic line. The series includes models with different numbers of light points, suitable for surface-mounting - ideal for a classic flat or house, but equally suitable for an office or commercial premises.

Rio wall and ceiling luminaires are classically simple light fittings made from high-quality materials. Rio is suitable for replaceable E27-type light sources of 60W each. Light bulbs are not part of the set and must be

selected separately. All of the luminaires in this series are IP20 rated, making them a suitable choice indoors.

The universal design of the series means that it will easily fit in with different types of interior decoration and gently complement selected rooms with light. An additional feature is that the light beam can be precisely directed.

RIO SP8, is a eight-point luminaire with movable heads, set on a long rectangular strip. The fixture is made of steel in black. The luminaire is suitable for illuminating long corridors, and will look good centrally placed as the main point of light. The independently adjustable lampheads allow for intensive illumination of even large rooms, as desired - evenly or spot-on.
