PRODUCT DESCRIPTION

Z-G LED connector helps to quickly connect the LED strip with a power supply unit, without any soldering. It can hold LED strips that are 10mm wide. A clip joint and a flexible wire make the installation even easier. Put the strip into the connector on one end of the element and connect power supply to the socket that is on the other end.

TECHNICAL DATA

General information:

Dimensions – width:	10 mm
Dimensions – length (mm):	160 mm
Degree of protection (IP):	20
