PRODUCT DESCRIPTION

Touch dimmer switch for LED strips, with max. 8A current and IP20 protection level. It is a small device measuring 10 x 48 mm which allows the LED strip in the profile to be activated and deactivated with the touch of a hand. The dimensions allow for installation in profiles with an internal width of more than 10 mm.

A model equipped with a practical light dimming function which, by holding the switch down for a longer period of time, allows you to vary the light intensity as required.

An IP20-rated switch means that it can only be used indoors.

Power max. 40W at 5V and 96W at 12V.

A great convenience is the easy installation - the device simply needs to be soldered to the LED strip on one side and to the power supply unit on the other.

TECHNICAL DATA

General information:

Type of accessory/spare part:	Układ sterujący
Accessory:	tak
Switch type:	Dotykowy
Voltage [V]:	5-24
Power max. :	5V-40W, 12V-96W, 24V-120W
Detection type:	Dotyk
Suitable for dimmer:	tak
Built-in diode:	tak
Degree of protection (IP):	IP20
Protection class:	III
Mounting:	Wbudowany
Current max. [A]:	8
Width [mm]:	10
Height/depth [mm]:	1
Length [mm]:	48
