PRODUCT DESCRIPTION

LED connector type "T" for 8 mm wide LED strips with max. power 48V. This solution makes it possible to combine three sections of single-color LED strips. Thanks to its small size, it works well for connecting strips in aluminium profiles - with the need for soldering.

The model allows the use of additional compression connectors - in which case there is no need to solder the connector to the strip.

Dimensions 24 x 16mm.
