PRODUCT DESCRIPTION

The THANGO LED desk lamp is a functional lighting for indoor use in offices as well as at home for study areas.

The lamp is suitable for 230V operation. Equipped with an energy-saving, non-replaceable 8W LED light source that generates a luminous flux of 600lm, it ensures comfortable and even illumination of a worktop. The

user may adjust the light colour to suit their needs with the help of three modes – 3000K, 4000K and 6000K. A warm colour helps to relax, a neutral colour does not fatigue the eyes, and a cold colour favours studying or working. In addition, the brightness control allows to regulate the light intensity, making it more comfortable to use regardless of the time of day.

The THANGO LED is equipped with a movable arm with two adjustment points in order to freely adjust the angle of the light. The lamp may also be easily folded if required.

The lamp is installed on a classic base. The housing is made of plastic in white.

Length of power cable: 1,2 m.

Dimensions: 116x340x163 mm.
