

E14 / GU10 light sources adapter

Marka: **Virone** | Symbol: **LH/E14/GU10-14** | Ean: **5908254827891**

PRODUCT DESCRIPTION

The porcelain-metal E14/GU10 bulb adapter is a smart solution when not everything fits together well. It allows the use of a bulb with a two-pin GU10 base (e.g., LED bulbs) in an E14 socket. Neatly designed, made of durable and safe materials, the adapter is easy to install. You can also easily unscrew it yourself. What does this mean in practice? Let's just say that you can use newer generation bulbs, such as those with a two-pin base, even in luminaires designed for traditional light sources, without any need to modify your lighting. The adapter will not only allow you to use the existing lamps more efficiently, but also reduce electricity

consumption - at home, in the office or in a home workshop. Efficiency pays off!

TECHNICAL DATA

General information:

Base / holder:	E14/GU10
Nominal voltage:	230V~, 50Hz
