

Lamp holder shade ring E27

Marka: **Virone** | Symbol: **LH/E27-26** | Ean: **5904988907472**

PRODUCT DESCRIPTION

The E27 lamp holder ring is a component that is used to fix a lampshade to the fixture of a lamp. The product is shaped like a ring with a handle that allows the shade to be easily twisted and unscrewed from the fixture. There are grooves on the inside of the ring that allow the shade to be accurately fixed to the fixture.

The mounting ring for an E27 lamp holder is often sold in a set with a nut, which is dedicated to fixing the ring on the lamp. The nut is usually made of the same material as the ring and has an E27 thread that fits most

lamp holders.

The whole product is extremely easy to use and can be used for many different types of lamps. The E27 lamp holder ring is easy to fit and remove, so it can be easily replaced if necessary.
