PRODUCT DESCRIPTION

A bicycle light in a duck-shaped casing with a built-in bell is a functional and fun cycling gadget, extremely useful during a ride. The built-in 800 mAh battery provides mobility and convenience. It is charged via included USB-C cable.

The product may be controlled via buttons placed on the duck housing and by connecting a cable, which may then be attached to the handlebars of the bike.

The device combines the functions of a front bike light and an audible signal, ensuring not only visibility but also safety on the road. The light is equipped with a 1W LED with a luminous flux of 130 lm. It offers 3 modes: high, low, strobe and a bell function with 4 selectable sounds. The lighting range is up to 10 meters. The sound is changed by a double button press.

The housing is IPX4 rated and is resistant to water splashes, e.g. when driving through a puddle or in the rain.

The duck has a removable helmet with a propeller that rotates as it rides. Two colour variations of the helmet are available. The product is sold as a display of 8 pieces (mix of colours).

The dimensions measure: 85x60x115 mm.
