

Emergency flashlight, 270/105lm, 1200mAh, seat belt cutter, window breaker

Marka: **Virone** | Symbol: **LT-30** | Ean: **5908254851506**

ViRONE

PRODUCT DESCRIPTION

The multifunctional LED flashlight works wherever an additional source of light is needed and is an essential component of any vehicle thanks to its safety-enhancing features. It is also helpful in a flat or garage, as well as at the campsite, during mountain hiking or other outdoor activities.

The flashlight is equipped with a 1.200 mAh Li-ion battery that is conveniently charged via a USB-C port (30 cm charging cable included).

The device offers two light sources: front and side. The main 5W LED is a classic light. It provides a luminous flux of 270lm offering a lighting range of up to 200 m. The 1W COB side panel allows the device to be used as a torch, e.g. when camping, working in the workshop or in the event of a car breakdown. A luminous flux of 105lm provides a range of up to 20 m. The LED COB technology distributes the light evenly and is energy-efficient.

The device allows for effective illumination of both close and very distant areas. It offers four operating modes: high, low, strobe and LED COB mode. This makes it easy to adjust the intensity and type of the lighting to the prevailing conditions and to the user requirements. The strobe mode may be used as a warning light. The zoom function allows the light beam to be precisely focused on a single point.

The product features emergency functions making it an indispensable tool in the car. The safety hammer allows the glass to be broken quickly in an emergency situation, such as a traffic accident or jammed door. The flashlight is also equipped with a practical belt cutter, which allows you to free yourself immediately if necessary – an important feature to increase passenger safety during the journey. However, it is important to remember to take extra care when using rescue tools, especially when breaking glass, to avoid accidental injury.

The aluminium housing and the high IK10 rate ensure resistance to any external damage. In addition, the flashlight is IP44 rated, meaning it may be used in harsh weather conditions.

The product features compact design. Its dimensions measure 148 x 35 mm, so it fits easily into a glove box, rucksack or work trouser pocket. Black colour.

The product is sold as a display containing 12 pieces.

TECHNICAL DATA

General information:

Lamp type:	LED, niewymienne
Power [W]:	5/1
Luminous flux [lm]:	270/105
Power type:	Akumulator Li-ion
Battery capacity [mAh]:	1200
Battery type:	Akumulator zainstalowany na stałe
Number of batteries:	1
With batteries:	tak

Number of light modes:	4
Modes of operation:	Tryb wysoki, tryb niski, tryb stroboskopowy, LED COB
Rechargeable:	tak
Light range [m]:	200/20
Color temperature [K]:	7000
Color rendering index Ra/CRI:	80
Lifespan L70/B50 [h]:	30000
Number of switching cycles:	50000
Degree of protection (IP):	IP44
Impact protection IK (shock resistance):	IK10
Model:	Turystyczne i survivalowe
Material:	Aluminium
Colour housing:	Czarny
Length/height [mm]:	148
Width [mm]:	35
Depth [mm]:	35
Weight total [g]:	160
The ports:	USB-C
Accessories:	Kabel ładowania (30cm)
Additional information:	Młotek bezpieczeństwa, przecinak do pasów, zoom
Rechargeable:	tak
With light source:	tak
