

Full motion dual monitor arm, 13"-27" MAX LENGTH

Marka: **Virone** | Symbol: **MH-4** | Ean: **5904988907366**

ViRONE

PRODUCT DESCRIPTION

The desk arm for two monitors, is a convenient and safe solution. The holder allows the comfortable use of two screens and independent adjustment of their positioning, and allows full adjustment of the screens in three dimensions: Tilt angle of $+90^{\circ}$ to -90° , screen rotation right-left $\pm 90^{\circ}$, arm rotation of 270° , PIVOT function, i.e. changing position from horizontal to vertical (and vice versa), height adjustment of 430 mm.

With the help of the solid arm, mounted to the tabletop, you will be able to safely install two monitors with

diagonals between 13" and 27". Mounting can be carried out to a worktop or desk - on the edge - without dust, drilling or disturbing the furniture structure, or through a hole in the worktop.

The monitor arm mount will work well with tabletops from 10 to 100 mm thick. The maximum load capacity of each arm is 10 kg. The arm spacing is 735 mm (centre of screen), giving a maximum arm reach of 367 mm.

The countertop monitor mount is made of powder-coated steel and is characterised by its durability while looking aesthetically pleasing. The equipment complies with VESA 75 (mounting hole distance 75x75 mm) and VESA 100 (hole distance 100x100 mm) standards.

TECHNICAL DATA

General information:

Suitable for:	Monitor
Mounting method:	Inne
Pivoting range [°]:	90
Angle of inclination [°]:	90
Load bearing capacity [kg]:	20
Mounting Interface Standard (MIS) according to VESA:	100x100
Colour:	Czarny
