

LED mirror rectangular 60x50 cm, horizontal installation, built-in switch, with margin, 4000K

Marka: **Virone** | Symbol: **ML-11/4** | Ean: **5904988906383**

PRODUCT DESCRIPTION

The rectangular LED mirror with a built-in switch is not only a functional fitting but also an elegant lighting addition to every interior. A delicate sandblasted margin adds subtlety and creates a unique visual effect. The mirror has hooks, thanks to which it is ready to be hanged anytime (may be installed horizontally).

It has a 170cm long LED strip with the power of 6W/m. The LED strip is installed behind the mirror; in this way, it is invisible, and the mirror stays aesthetic. The colour temperature of 4000K ensures illumination that is natural

and pleasant to the eye.

The driver's high ingress protection rate (IP67) protects it from moisture and dust; therefore, the mirror works not only in bathrooms but also in other spaces as well.

The mirror measures 60x50cm.
