PRODUCT DESCRIPTION

The cable reel enables to safely and reliably connect multiple devices. It is equipped with 4 Schuko-type sockets (2P+E) with safety shutters, which ensure convenience and compatibility with various electrical appliances.

Thanks to its durable construction made from high-quality plastic and a single thermal switch serving as an overload protection, it ensures peace of mind and safety.

The PVC cable 50m long with H05VV-F 3x1,5mm² specification provides flexibility and freedom of use, even if away from an outlet. The maximum load is 1100W/4,8A when the cable is coiled, and 3200W/13,9A when the cable is uncoiled. Even the most demanding devices can be connected without any worries.

The anti-twist system (fixed sockets) is an innovative feature designed to eliminate cable twisting during use, especially when four devices are connected at the same time. A convenient handle for carrying as well as crank handle for winding the cable provide ergonomics and comfort during transport.

The dimensions measure 247x341mm Black and dark blue colour.
