

Pull chain lamp switch, silver, 3A/250VAC

Marka: Orno | Symbol: OR-AE-13316/G | Ean: 5908254852817

PRODUCT DESCRIPTION

Choose a pull chain switch if you want to quickly control your lights without reaching for the lamp's body. One movement of the hand is enough to turn the circuit on or off – the mechanism reacts when the chain is pulled.

This element works well in places where you need simple, manual control. The chain is 2 meters long, so you can easily reach it at different mounting heights.

The body made of PC and copper ensures stable operation. The silver, glossy finish complements lamps and devices with cooler housing colours. The silver control element stands out well against the black/transparent background, so you can immediately see where the cable (chain) is.

The IP20 rate and 250 V / 6 A parameters make the switch suitable for typical home installations and devices with moderate loads.

TECHNICAL DATA

General information:

Wiring system:	Styk zwierny (NO)
Method of operation:	Cięgno
Assembly arrangement:	Inne
Mounting method:	Inne
Type of fastening:	Inne
Material:	Tworzywo sztuczne
Material quality:	PC, Miedź
Surface protection:	Stan surowy
Surface finishing:	Błyszczący
Colour:	Srebrny
Colour of switch operator:	Czarny
Label space/information surface:	Tak
Illumination:	Nie
Suitable for degree of protection (IP):	IP20
Nominal voltage [V]:	250
Rated current [A]:	6
Connection type:	Inne
Device width [mm]:	27
Device height [mm]:	165
Device depth [mm]:	16
Weight [g]:	12

Chain length [mm]:

200
