

One-truck switch, white push button, white housing

Marka: Orno | Symbol: OR-AE-13317/1P/W/W | Ean: 5908254852824

PRODUCT DESCRIPTION

Install a switch in a lamp or small device, even in the one of your own design. Thanks to it you may turn the power on and off with just one move of your thumb. You will no longer have to unplug the device to turn it off.

The switch is useful for desk lighting, night lighting, decorative lighting and simple DIY systems.

It works as a single-pole OFF-ON switch, so it cuts off or applies power to one wire. This allows you to use it in

lamps, LED modules, small appliances and projects that require simple, manual control.

The ABS housing is resistant to typical impacts and pressure, and the screw terminals allow for quick connection of cables.

Simply tighten the two ends of the phase wire and close the housing - no soldering required.

The rated current of 6 A allows for safe control of lighting and small household appliances if the device is within the acceptable parameters.

TECHNICAL DATA

General information:

Wiring system:	Łącznik 1-biegunowy
Method of operation:	Przycisk wahadłowy
Assembly arrangement:	możliwość łatwego włączenia i wyłączenia obwodów elektrycznych
Push button switch:	Tak
Number of rockers:	1
Mounting method:	Inne
Type of fastening:	Mocowanie śrubowe
Material:	Tworzywo sztuczne
Material quality:	ABS, Miedź
Surface finishing:	Błyszczący
Colour:	Biały
Colour of switch operator:	Biały
Label space/information surface:	Tak
Illumination:	Nie
Suitable for degree of protection (IP):	IP20
Nominal voltage [V]:	250
Rated current [A]:	6
Connection type:	Zacisk śrubowy

Device width [mm]:	65
Device height [mm]:	27
Device depth [mm]:	22
Weight [g]:	14.6
Frequency [Hz]:	50/60
Temperature resistance [°C]:	120
Resistance load [KW]:	1.5
