

Two-track switch, white push button, white housing

Marka: Orno | Symbol: OR-AE-13317/2P/W/W | Ean: 5908254852862

PRODUCT DESCRIPTION

Install this switch when you want to cut off two wires at the same time. The two-track design allows you to disconnect the entire circuit with one movement, which increases safety and is useful where both wires need to be disconnected simultaneously.

The switch operates in OFF-ON mode and is suitable for simple systems such as table lights, LED modules, lamps, small appliances and DIY projects.

The white housing goes well with light-coloured cables and modern equipment. The body is made of durable ABS plastic.

Screw terminals make installation easy: simply insert the wires, tighten the screws and close the housing.

The unit is a good choice when you need a mechanical switch that disconnects the entire power line with one movement.

Safety - eliminates the risk of electric shock if the plug is inserted into the socket backwards.

TECHNICAL DATA

General information:

Wiring system:	Łącznik 2-biegunowy
Method of operation:	Przycisk wahadłowy
Assembly arrangement:	możliwość łatwego włączenia i wyłączenia obwodów elektrycznych
Push button switch:	Tak
Number of rockers:	1
Mounting method:	Inne
Type of fastening:	Mocowanie śrubowe
Material:	Tworzywo sztuczne
Material quality:	ABS, Miedź
Surface finishing:	Błyszczący
Colour:	Biały
Colour of switch operator:	Biały
Label space/information surface:	Tak
Illumination:	Nie
Suitable for degree of protection (IP):	IP20
Nominal voltage [V]:	250
Rated current [A]:	6
Connection type:	Zacisk śrubowy

Device width [mm]:	65
Device height [mm]:	27
Device depth [mm]:	22
Weight [g]:	14.6
Frequency [Hz]:	50/60
Temperature resistance [°C]:	120
Resistance load [KW]:	1.5
