

Doorbell button, battery-powered, for wireless doorbells, TULO series, white

Marka: **ORNO Home** | Symbol: **OR-DB-KD-177PD/W** | Ean: **5908254849954**

PRODUCT DESCRIPTION

The wireless button to extend doorbells from TULO series does not require installation – simply place the transmitter at the door or a wicket. The device operates on a frequency of 433.92MHz. Its range reaches up to 150 m in the open field, which allows for great freedom in placing the transmitter, even at a great distance from the house.

The transmitter features IP44 rate, which provides effective protection against rain and dust. This makes it

ideal for outdoor applications, even during harsh weather conditions. The unit has a backlit that makes it easy to use the doorbell in the dark and a practical plate for a name or house number. Power is provided by a built-in CR2032 battery. Made of durable plastic in white. Dimensions measure 33x77x18 mm.

Thanks to the learning system, TULO DC makes it possible to add additional transmitters that may be installed at different entrances, such as the main door, side door or wicket. All transmitters can be connected to a single receiver.

TECHNICAL DATA

General information:

Wireless:	tak
Type of current:	DC
Nominal voltage [V]:	3
Battery - type and quantity :	CR2032
Built-in battery:	tak
Transmitter max. power [mW]:	10
Degree of protection (IP):	IP44
With lighting:	tak
With name plate:	tak
Shape:	Prostokątny
Colour:	Biały
Material:	Tworzywo sztuczne
Mounting method:	Montaż natynkowy
Width [mm]:	33
Height [mm]:	77
Depth [mm]:	18
