Marka: **ORNO Home** | Symbol: **OR-DOM-BA-933/B** | Ean: **5908254847134**

### PRODUCT DESCRIPTION

SANDI single family audio doorphone set is a modern and designer device, thanks to which, the entrance to the premises is easily controlled. SANDI was designed basically to make the household members feel safe and comfortable. Its innovative style composes with every interior, both with single-family houses and small offices.

The indoor unit of the presented model is equipped with a touch function being extremely easy and intuitive in

operation. Pressing one button starts a conversation, and managing an electric strike and a gate facilitates convenient opening of the wicket or the gate from the indoor unit. As there is no handset, the user does not need to pick or hang it up. The unit is made of black plastic measuring 180 x 130 mm. Surface-mounted.

The outdoor unit has built-in code lock with RFID reader, thanks to which one may access the property not only with the help of the code but also with the help of a tag and Mifare proximity card. It features small dimensions and fits even a narrow fence post (up to 48mm width). High ingress protection rate of IP65 makes one not to worry about durability of the device even under a large stream of water. The unit is made of stainless steel in black.

The outdoor unit is supplied from the indoor unit. There is no need to run additional power supply to the outdoor unit or to the electric door strike (max. 300mA), which limits the number of cables run through the garden. The set has two wires ensuring quick and easy installation. What is more, if one wants to connect a gate, the wires may be run directly from the outdoor unit.

The SANDI audio doorphone set is equipped with volume regulation option, depending on preferences, as well as with the option of selecting a melody out of 12 different ones available. The device works well also within families with small children – the call bell may be muted e.g., during the child's nap.

## TECHNICAL DATA

### General information:

Type:	jednorodzinny
With video:	nie
Current supply:	Zasilanie sieciowe
Nominal voltage:	15V DC
Type of transmission:	przewodowy
Can be connected to smartphone:	nie
Installation technique:	Dwużyłowe
Number of wires:	2
Number of indoor stations:	1
Number of outdoor stations:	1
Expandable to max. number of indoor stations:	1
Expandable to max. number of outdoor stations:	1
