

LEKIO, single family audio doorphone set, wireless, hands-free, 440m, black

Marka: **ORNO Home** | Symbol: **OR-DOM-YR-934/B** | Ean: **5908254845871**

PRODUCT DESCRIPTION

The wireless doorphone set LEKIO is a perfect solution for single family houses and small companies, which do not have cables run to a wicket. The device works well for those who want to control the entrance to the property.

The doorphone is equipped with a battery (1x18650 type), which guarantees a long-lasting operation and simultaneously eliminates the need of running cables to the wicket. The range in the open field is up to 440 m,

thus enabling installation of the outdoor unit both on a door and wicket even in a great distance from the house. The 18650 is a standard battery, so even after many years of use, it can be easily replaced maintaining the full functionality of the doorphone.

The indoor unit is hands-free which significantly increases the comfort of use. The device has also a charging base which may act as a base, or simply as a charger from time to time.

The 38 ring tones and 4 stages of volume control are a great choice to customize the call tone and volume to one's own preferences or to any circumstances.

Despite its simple operation, the indoor unit has a modern design, and its black colour harmonizes with every interior. The dimensions measure 54x130 mm.

The battery in the outdoor unit may be charged or permanently supplied with 5V DC via USB C connector. Controlling the electric door strike is possible thanks to the control module (included). After supplying it with 12V DC and connecting to the electric strike, the module communicates with the doorphone and receives a signal to open. The module acts simultaneously as an exit button, provides security and ease of operation at a distance.

The outdoor unit, IP54 rated, is equipped with a protective cover which guarantees resistance to adverse weather conditions and rain. It is made of high-quality plastic. Its dimensions measure 59x135 mm in order to facilitate installation on a narrow fence post or in a place where it will not occupy unnecessary space.

Thanks to the possibility of expanding LEKIO with up to 5 components, the user has a freedom of configuration customizing it to one's own needs. The possible configurations are: 1 outdoor unit and 4 indoor units, 2 outdoor units and 3 indoor units or 3 outdoor units and 2 indoor units. Additionally, the intercom feature increases the comfort of household members, and in case of small companies, facilitates transfer of information between employees.

TECHNICAL DATA

General information:

Type:	jednorodzinny
With video:	nie
Current supply:	Bateria (akumulator)
Battery - type and quantity (receiver):	1x18650
Nominal voltage:	5V DC
Type of transmission:	beprzewodowy

Frequency [MHz]:	433.92
Max. transmission range [m]:	440
Can be connected to smartphone:	nie
Installation technique:	Inne
Number of indoor stations:	1
