

Wireless under-desk hidden charger

Marka: Orno | Symbol: OR-GM-9021 | Ean: 5908254820694

PRODUCT DESCRIPTION

This invisible wireless under-desk charger is used to charge devices compatible with the Qi V1.2 standard, such as tablets or smartphones without the need to connect them with a standard cable. The charger has an automatic detection function. It starts charging after connection of power supply right after a receiver has been placed in the center of the charging pad. If the receiver is moved away, charging process is interrupted and the device goes into standby mode. Designed for indoor installation, directly in furniture tops, desks or tables with a minimum thickness of 15mm. The device has a USB-A cable with a length of ca. 150 cm for

connection of a USB power supply unit (not included).
