

Insulated distribution busbar N, 15 wires, blue

Marka: Orno | Symbol: OR-LZ-8208/15/BL | Ean: 5908254851124

ORNO

PRODUCT DESCRIPTION

The insulated distribution busbar is a high-quality electrical component that is used to connect neutral cables (N) in a safe and orderly manner. The cables are fixed with screws to ensure permanent connection.

Equipped with 15 screw terminals, it allows the connection of 15 wires with a cross-section of 2.5 to 16 mm², ensuring reliable electrical connection. It is designed to operate at a maximum voltage of 690V, as well as an insulation voltage of 1000V and a current of 63A.

The compact dimensions of the distribution busbar (111x34x18 mm) and the IP20 protection rate allow the product to be safely integrated next to installed devices. A torque of 1.2Nm ensures a durable and solid wire connection. It is mounted on a DIN TH-35 rail or may be screwed to the mounting plate. The blue colour is commonly used to indicate the neutral cables.

The product meets the standards: EN 60998-1 and EN 60998-2-1.

TECHNICAL DATA

General information:

Core cross section [mm ²]:	2,5 - 16
Number of poles:	15
Max. current [A]:	63
Max. voltage [V]:	690
Max. voltage of isolation [V]:	1000
Torque [Nm]:	1.2
Colour:	Niebieski
Width [mm]:	111
Height [mm]:	34
Depth [mm]:	18
Compliance with the standard:	EN 60998-1, EN 60998-2-1
