PRODUCT DESCRIPTION

Modular series with a symmetrical frame plate system (for 1-, 2-, 3-, 4-, 5-modules) allowing the product to be mounted in both horizontal and vertical positions. The modern quick-connect mechanism (wires are connected by pushing them directly into the body) provides secure and safe wire installation and removal. The sockets are equipped with traditional screw connections. The internal design of the terminals guarantees secure connection of wires from 0.75 mm² to 2.5 mm². Strong and robust mounting plate grid and high-quality self-retracting elements enable stable and secure installation in the box. Special springing elements facilitate

fitting the frame into the body.

The single-pole switch is adapted to flush mounting. It is the simplest basic switch which operates on a single circuit and to which, for example, a single lamp can be connected. However, the product can also control other devices in the environment. It should be used indoors (IP20).

The product is available in three colors: white, black and anthracite. Dimensions 81x81x41mm.
