

## Wi-Fi hub - central socket with radio transmitter, ORNO Smart Home, Schuko

Marka: ORNO Home | Symbol: OR-SH-1731(GS) | Ean: 5908254828621

### PRODUCT DESCRIPTION

The central socket is a device that is key to ORNO Smart Home systems. It enables Wi-Fi connectivity with the user, who can control their smart home using an Android or iOS app.

The central socket is based on the TUYA app engine, which means it is compatible with other smart home systems such as Google Home and Alexa.

The 2P+E Schuko type socket allows the use of sockets and relays, which are its actuators and which can be controlled via a 433MHz radio transmitter.

This gives you control over your home and the equipment or lighting in it, including the ORNO Smart Home system, which allows you to freely combine transmitters and receivers from this series. It also works with classic wireless socket sets ORNO (OR-GB-440(GS), OR-GB-439(GS), OR-GB-438(GS), OR-GB-441(GS).

The most important features of the central socket software are the ability to schedule tasks and the timer function, so you can delay the switching on or off of the device. In addition, various dependent event programming options are available, allowing you to have even more control over your smart home.

The maximum load of the socket is 3000 W.

## TECHNICAL DATA

### General information:

<b>Max. number of controllable devices:</b>	50
<b>Pre-programmed:</b>	nie
<b>Wireless:</b>	tak
<b>Signal transmission:</b>	Sterowanie radiowe
<b>Signal frequency [MHz]:</b>	433
<b>Adaptive (self-learning):</b>	nie
<b>Height [mm]:</b>	80
<b>Width [mm]:</b>	55
<b>Depth [mm]:</b>	55
<b>Uni-directional:</b>	nie
<b>Bi-directional:</b>	tak
<b>Wi-Fi connection:</b>	tak
<b>Work with TUYA:</b>	tak
<b>Voltage [V]:</b>	230
<b>Frequency [Hz]:</b>	50
<b>Max. Load [W]:</b>	3000
<b>Socket type:</b>	Ze stykiem ochronnym (SCHUKO)

Color:	biały
Degree of protection [IP]:	IP20
