

Smart door lock with fingerprint reader and code lock, IP44, long

Marka: **ORNO Home** | Symbol: **OR-ZS-855** | Ean: **5908254823503**

PRODUCT DESCRIPTION

Smart door lock with fingerprint reader and code lock is an innovative solution with an automatic locking mechanism, designed for installation in the place of a standard lock cylinder, which releases the latch only after a correct PIN code has been entered, or through a smartphone application using Bluetooth. The fingerprint reader significantly increases functionality and safety. The maximum number of fingerprints stored is 100. The set includes a service key for a built-in lock cylinder that allows door opening in the event of a battery or electronics failure. No cables required, powered by 4x AA alkaline batteries LR6, which are included

in the set.

TECHNICAL DATA
