

Video monitor 7", to expand PAVONIS and PAVONIS MULTI sets, Wi-Fi, touch screen

Marka: **Virone** | Symbol: **VDP-67PMV** | Ean: **5908254828553**

PRODUCT DESCRIPTION

The Pavonis system is also highly expandable (a maximum of 1 additional outdoor unit, 3 monitors and 2 CCTV cameras in addition), so it is ideal for multi-storey houses, villas and larger properties. Extending the set with an additional monitor allows each monitor to be used as an intercom.

The Pavonis monitor has a 7-inch touchscreen equipped with intuitive navigation, allowing you not only to easily check who is visiting you, but also to manage the photo log, answering machine, call volume, mute,

weather station or digital frame function. It connects to Wi-Fi and Tuya's dedicated smart home platform, making it easy to control entrances and events around the property, even when no one is home, and, with the use of an additional SD card, to save recordings and photos of such events.
