

## Single family video outdoor unit, Full HD, to expand ACERO sets

**VIRONE**Marka: **Virone** | Symbol: **VDP-71KV** | Ean: **5908254845260**

### PRODUCT DESCRIPTION

The video outdoor unit to expand ACERO set facilitates access to a property for authorised persons with the help of one button built into the device. The outdoor unit is equipped with a name label. The electric door strike with a maximum current consumption of 300mA is powered directly from the video doorphone, thus reducing the number of wires run to a wicket.

A camera with wide 93° horizontal and 46° vertical viewing angle, built into the ACERO outdoor unit, provides

a full view in front of the wicket both during a call and while monitoring.

The outdoor unit equipped with a motion sensor facilitates video recording and photo taking after a movement near the wicket is detected. The incident is recorded on microSD card. The 1920x1080 Mpx Full HD camera registers videos and photos with a very clear image. White LED lighting ensures excellent image quality even after dark.

The 64x153 mm outdoor unit is made of aluminium and has a rain cover. The IP44 rating guarantees durability and weather resistance.

The set may be expanded with an additional outdoor unit (max. 2 per set).

## TECHNICAL DATA

### General information:

<b>Installation technique:</b>	System wieloprzewodowy
<b>Number of wires:</b>	4
<b>Mounting method:</b>	Montaż natynkowy
<b>Number of call buttons:</b>	1
