

## Ventilation grille with net Ø100, white

Marka: **Virone** | Symbol: **VG/N/100/W** | Ean: **5904988914661**

**ViRONE**

### PRODUCT DESCRIPTION

Surface-mounted ventilation grille with round outlet. It is used in supply and exhaust ventilation systems, outdoors and indoors. Recommended for installation in spiro pipes and other ventilation systems. The advantage of this ventilation grille is the net already poured in at the production stage (integrated), which keeps insects away from the apartment.

Our unique way is to incorporate the net at the production stage so that it does not get dirty, torn or

damaged and is in the colour of the grille - permanently retaining its aesthetic qualities. The shape of the louvre directs the air 'downwards' so that there is no cooling effect in the rooms where our ventilation grille is installed.

Grille material: ABS.

Colour: white.

Dimensions: 172x172 mm.

Opening diameter: 100 mm.

## TECHNICAL DATA

### General information:

Material:	ABS
