

Round ventilation grille with net Ø150, white

Marka: **Virone** | Symbol: **VGR/N/150/W** | Ean: **5904988914715**

PRODUCT DESCRIPTION

The round ventilation grille with net is the end of the supply and exhaust ventilation system for outdoor and indoor use. Recommended for installation in spiro pipes and plastic ventilation systems, as well as under flat roofs.

The advantage of this ventilation grille is the net, poured in at the production stage, which keeps insects away from the apartment. Our unique way is to incorporate the net at the production stage so that it does

not get dirty, torn or damaged and is in the colour of the grille – permanently retaining its aesthetic qualities. The shape of the louvre directs the air 'downwards' so that there is no draught effect in the rooms where our ventilation grille is located.

Grille material: ABS.

Available in white and graphite.

Grille diameter: 178 mm.

Opening diameter: 150 mm.
