

Telescopic workshop LED lamp with magnet and movable head, 17-57 cm, 3 LED, 4 x LR44

Marka: **Virone** | Symbol: **WL-9** | Ean: **5908254817304**

PRODUCT DESCRIPTION

A highly practical device that combines a flashlight and a magnet, it will be very useful in any home, garage or workshop. The light source in the flashlight consists of 3 strong LEDs that generate strong and bright light. The flashlight gives much more light compared to traditional products and is much more economical at the same time. It is powered by 4 LR44 batteries, which are included in the set. It shines within a range of up to 150m. The flashlight has a strong, aluminum construction that makes it impact and shock resistant. The head of the flashlight is bent and its telescopic arm can be extended within the range of 17 - 57 cm. There is a built-in

magnet in the lower part of the flashlight, which can be used to lift bolts and nuts in slots or other hard-to-reach places.
