

Multifunctional wireless weather station, touch buttons

Marka: **Virone** | Symbol: **WS-5** | Ean: **5908254843433**

PRODUCT DESCRIPTION

The multifunctional weather station helps to precisely monitor weather conditions around a house. Thanks to wireless installation there is no need to run additional cables. Simply put a transmitter outside, and a receiver inside the house in a preferred location.

The station has a clear screen with a colorful display and touch buttons. The range in the open field is 30 m, therefore, you may place the transmitter further from the receiver.

You may connect the station to a power source to eliminate a possible battery drain. You may also supply it using three classic batteries (3xAAA – not included). These possibilities ensure an uninterrupted operation of the device even in the case of a power shortage.

The device is enriched by the following functions: an alarm with a snooze function, weather forecasting, your comfort level indicator with regard to apparent temperature as well as a moon phase indicator. The black housing makes it aesthetic and elegant so that it fits perfectly in every interior.

The station was designed for multiple installation techniques. You may hang it on the wall or place on a desk. This convenient solution ensures an easy access to updated information on weather conditions.

The IP44 transmitter is resistant to rain, dust and difficult weather conditions. Charged with two batteries (2xAAA - not included).

The device measures the differences in temperature and air humidity with a wide measurement range from -40°C to $+70^{\circ}\text{C}$.

It may be expanded with two additional transmitters placed anywhere in the home. This is useful to obtain more precise measurements in different rooms.

TECHNICAL DATA

General information:

Wireless:	tak
Range in the open area [m]:	30
Frequency:	433MHz
Separate sensor:	nie
Other features:	Alarm, prognoza pogody, wskaźnik poziomu komfortu, fazy księżyca

Indoor station:

Indication:	Cyfrowy
Multiple display:	tak
Type of current:	DC
Nominal voltage [V]:	4,5V

Type and number of batteries:	3 x AAA
Built-in battery:	nie
Measuring range:	-10°C~+50°C
Measurement of differential temperature:	tak
Measurement of relative air humidity:	tak
Measured value memory:	tak
Width [mm]:	140
Height [mm]:	116
Depth [mm]:	25
Other features:	Możliwość rozbudowy do 3 czujników zewnętrznych

Outdoor sensor:

Measuring range:	-40°C~+70°C
Type of current:	DC
Nominal voltage:	1,5V
Type and number of batteries:	2 x AAA
Built-in battery:	nie
Degree of protection (IP):	IP44
Width [mm]:	50
Height [mm]:	95
Depth [mm]:	26
