

Multifunctional wireless weather station, Wi-Fi, black

Marka: **Virone** | Symbol: **WS-6** | Ean: **5908254846281**

VIRONE

PRODUCT DESCRIPTION

The multifunctional weather station is a device enabling to precisely monitor current weather conditions around the house and forecast the weather for the next four days. As it is wireless, one does not need to run additional cables. Simply place the transmitter outside, and the receiver inside in the desired place.

The weather panel has clear screen with colour display and touch buttons. The range in the open field is as much as 30 m, thanks to which the transmitter may be placed at a greater distance from the receiver.

The device may be connected to DC power source, so one does not need to worry about batteries getting low. The weather station is powered by three classic batteries (3xAAA – not supplied). This universality enables uninterrupted operation even in case of power shortage.

The device is equipped with Wi-Fi feature, which facilitates remote managing with the help of Tuya Smart app on a smartphone. Simply install the platform (supports Android and iOS) and pair it with the weather station. Thanks to this, one may manage the device from any place in the world.

The appliance has also additional features, such as an alarm with snooze, weather forecasting, comfort indicator as well as moon phase reading.

One may set up to three alarm clocks in Tuya Smart app, as well as alarms for exceeding the minimum or maximum temperature. The device alarms the user with the help of push message on the phone. What is more, the appliance enables to generate graphs of temperature or humidity records for a given day or month. Thanks to this, one may easily verify the weather in a given period.

The weather station was design for various installations techniques. One may hang it on the wall or place on a desk. This convenient solution ensures easy access to current weather conditions any time. The transmitter IP44 rated ensures resistance to rain, dust and harsh weather conditions. Powered by two batteries (2x AAA – not supplied).

The weather station allows to measure temperature and humidity differences with a wide range from -40°C to +70°C.

The device may be expanded with two additional transmitters which may be placed anywhere in the house. This is useful for obtaining more precise measurements in different rooms.

The black housing makes it look aesthetic and elegant, therefore a perfect choice for various interiors. The dimensions measure 50x95 mm.

TECHNICAL DATA

General information:

Wireless:	tak
Range in the open area [m]:	30
Frequency:	433MHz
Separate sensor:	nie
Can be connected to smarphone:	tak

Wi-Fi Frequency:	2.4 GHz
Wi-Fi standard:	802.11 b/g/n
App:	Tuya Smart
Other features:	Tuya, alarm, prognoza pogody, wskaźnik poziomu komfortu

Indoor station:

Indication:	Cyfrowy
Multiple display:	tak
Type of current:	DC
Nominal voltage:	4,5V
Type and number of batteries:	3 x AAA
Built-in battery:	nie
Measuring range:	-10°C~+50°C
Measurement of differential temperature:	tak
Measurement of relative air humidity:	tak
Measured value memory:	tak
Width [mm]:	205
Height [mm]:	127
Depth [mm]:	29
Other features:	Możliwość rozbudowy do 3 czujników zewnętrznych

Outdoor sensor:

Measuring range:	-40°C~+70°C
Type of current:	DC
Nominal voltage:	1,5V
Type and number of batteries:	2 x AAA
Built-in battery:	nie
Degree of protection (IP):	IP44
Width [mm]:	50

Height [mm]: 95

Depth [mm]: 26
